

Inspection of Bridges

The Director or his designee shall be responsible to ensure that any bridge within the town as defined by RSA 234:2, "Bridge defined" (a structure having a clear span of ten feet or more) is inspected bi-annually for evidence of deterioration or structural failure, as required by RSA 234:23, "Bridges on class IV & V highways and Municipally managed bridges on class II highways". The Director shall supply a written report of this inspection to the Town Administrator/Board of Selectmen, so that they may satisfy the requirements placed upon them by RSA 234:23 and 24 ("*Inspection and Report*").

From the Town of Amherst's Policy and Procedure Manual, 2009.
