

A UNH Technology Transfer Center Workshop  
5 Environmental Hours

## CULVERT MAINTAINER CERTIFICATION TRAINING OCTOBER 11, 2017—WHITEFIELD

**Purpose:** To discuss the maintenance and replacement of culverts under the NH Department of Environmental Services policies and procedures.

**WORKSHOP FEE:** The **Municipal Registration Fee** is \$100.00 and the **Private Registration Fee** is \$200.00. This price includes instruction, materials and catering. *These rates remain low due to generous grants from the FHWA and NHDOT.*

### What is this class about?

The three most important factors that affect the lifespan of a road are drainage, drainage, drainage. Keep your drainage under control and your roads living long with a culvert! A culvert is any closed conduit used to conduct surface runoff from one side of a road to the other, from underneath a road or driveway, and leading to a stream, lake, or detention basin. Culvert pipes come in many materials, shapes, and sizes, and each material has its own characteristics and advantages. The focus of this workshop is culvert maintenance and replacement.

*Upon successful completion of a brief exam, attendees will be eligible to apply for Certification through the NH Department of Environmental Services.*
