

# 2018 Build a Better Mousetrap Competition -Entry Form-

Have you or one of your co-workers recently built an innovative gadget or developed an improved way to do a job? The **Build a Better Mousetrap Competition** is the time to share this or another project your agency is proud of! Your innovation can be anything from the development of tools, equipment modifications, and/or processes that increase safety, reduce cost, improve efficiency, or improve the quality of transportation.

**Build a Better Mousetrap's** purpose is to collect and disseminate real world examples of best practices, tips from the field, and assist in the transfer of technology. The competition is a fantastic way for innovative ideas to be exchanged with others that may benefit from different concepts and perspectives. Your innovation can help another team!

Four categories will be considered this year:

- Inspection and Data Collection (automated/remote means, testing, time)
- Asset Management Techniques (GIS, mapping, decision support systems)
- Maintenance Tools and Methods (lifters, reachers, modifications, assembly)
- Facilities Improvements (storage, access, operations, services)

We encourage you to include a video, photo, or schematics with your entry and look forward to reviewing them.

Organization: \_\_\_\_\_
