Field Trip & Social

September 22, 2020

NH Public Works Association

Tour of Nashua Four Hills Landfill

Join us on a tour of one of the last municipal landfills left in the state. We will explore everything from gas collections, recycling, to new protocols for permitting, issues and difficulties in managing a landfill to meet current regulations, and the scope of how to keep it all running while keeping costs down for our residents. This is a great opportunity to see things firsthand! A representative from Sanborn Head will be presenting and provide a great commentary on the current state of waste!

Social at Historic Holman Stadium

While this pandemic has forced many of us to forgo in person meetings and events, we have created an opportunity for a socially distanced picnic and networking event so that we can all get together and relax, catch up, and listen to two great speakers – food included of course! Bob Cappadona from Casella Waste Systems will be on hand to discuss an issue that plagues us all - the current state of recycling. Bob is an expert in this field and can offer insights regarding recycling past, present and future. Nashua Mayor Jim Donchess will also join us to discuss the affect this pandemic is having on municipalities, and the changes that needed to be made to keep our towns and cities functioning during this difficult time.
