## What is NHPWMA?

The NHPWMA program is a network of municipalities that assist one another during emergencies through partnering agreements and a protocol for requesting and receiving aid. Since disasters seldom strike within municipal limits, NHPWMA allows communities from all over the state to respond to those most affected. Member contact information and inventories are available for each member of the program.

NHPWMA has helped numerous communities repair and restore damaged infrastructure, including during the floods of 2005, 2006 and 2007, and the ice storm in 2008.

Flooding

There are over 115 community members in the NHPWMA program. This includes access to personnel, such as road agents and public works directors, building inspectors, and water and wastewater operators and equipment, such as trucks, graders, and many more resources.

## How Does it Work?

During emergencies, members can either contact other members directly, use the toll-free hotline (877-731-9908) or use the pw.net email listserv. **Providing aid is optional; the needs of your community always come first.** Agreements are reciprocal; all members can help each other.

## Who Can Participate? Authorized under RSA 53-A

NHPWMA is currently available to municipalities and other governmental entities including village districts and private water and wastewater utilities.

*This program is approved by the  
New Hampshire Attorney General.*

## What Are The Benefits of Joining NHPWMA?

- Enables prompt and effective response.
- Provides for rapid and orderly rehabilitation of infrastructure.
- Allows access and exchange of specialized supplies, equipment, and personnel.
- Reduces vulnerability of participating communities.
- NHPWMA does not require any disaster declaration to activate, which means communities can request aid at almost any time (even for small scale events).
- If a federal emergency is declared, it facilitates FEMA reimbursement since reimbursement is contingent upon a pre-existing, signed NHPWMA agreement.
