

### *Utility System Records*

Information concerning underground utilities which may be developed (water, electric, gas) should be requested from Pennichuck Water Company, Public Service of New Hampshire, and National Grid respectively. Engineering plans and as-built drawings must become a permanent part of the road file. Prior to any municipal excavations, the department of public works office staff will file appropriate paperwork with Digsafe. All private work performed on town roads require a road opening permit and appropriate bonding. Road opening permit applications are available from either the planning office or the Department of Public Works office.

*From the Town of Amherst's Policy and Procedure Manual, 2009.*
