

### *Flagging*

Employees engaged in traffic control shall be familiar with proper flagging procedures, wear the appropriate safety vest, use flagging paddles when appropriately needed, and be sure appropriately placed signage defines the work zone. When management assigns two flaggers to a work zone, they shall be positioned at either end of the work area with some approved means of communications. They shall never turn their backs to oncoming traffic. When scheduling allows for only one flagger, he/she shall be positioned in the middle of the work zone directly across from the work area.

*From the Town of Amherst's Policy and Procedure Manual, 2009.*
